

SHOW GUIDE

There's never been a better
time to connect
with Somfy

somfy Building happiness

Somfy's connected residential and commercial solutions automate, inform, inspire and transform life.

- Change how a home owner uses their indoor and outdoor space with simple, flexible solutions that can be controlled remotely
- Create more comfortable and productive environments for the occupants of commercial buildings
- Learn how to actively promote, encourage conversation and stimulate interest in motorisation

The 2016 BMAA SuperExpo provides the opportunity to present our new products, solutions and services that will further strengthen our partnership with you and provide your customers with solutions to enjoy their daily life.

To view the full technical specifications of each product refer to the e-product database located on the [Somfy Pro website](#).

Operate motorised
applications from home
or away, with one plug,
no wires.

Cubee

Upgrade
Tahoma One
with additional control.

animeo IP

Makes it easy to manage
your commercial projects.

TaHoma™ One

Always Connected

The TaHoma™ One home automation system simplifies the interaction between the home owner and the motorised applications in their home. It's easy to transform their living environment and manage blinds, curtains, awnings, roller shutters and RTS enabled lighting to create a simpler way of life - one that is more secure, comfortable and energy efficient.

The intuitive and user-friendly interface has been optimised for smartphones and tablets. Your customers can stay connected to their home with ease via the free app, available with purchase of the TaHoma One Box on Android and iOS.

Intuitive

- Customisable interface
- View all devices at a glance
- 2 intuitive menus
- Communicates over the home's WiFi network

Just 2 simple menus to connect and manage all the applications in your home

My Home

- Flexibility to control your home
- Shows all the compatible applications in your home at a glance
- Control your motorised applications with options such as individual or group control

My Scenes

Play Your Favourite Scenarios for Maximum Comfort

- With just one touch you can create unique scenarios to match your daily routines and activities
- Set scenarios to automate your motorised applications and lighting on a seven day schedule so you can effortlessly enjoy their many benefits

Cubee

Upgrade TaHoma™ One with an additional control

Turn this stylish Cubee and play the pre-set scenarios. This is perfect for the most popular scenes your customer plays everyday such as the "evening" scene where all the blinds go down, and lights turn on, or the "entertaining" scene where the blinds open and the awning extends.

Each face represents a scenario, turn the Cubee to play the desired scene.

Somfy myLink

Operate motorised applications from home or away, with one plug, no wires

- 20 channel RTS control
- Create scenarios up to 20 days ahead or consider a seven day schedule to complement weekdays and weekends
- 20 scenes
- 25 schedules
- Multiple Somfy myLink's on the one installation

Control

Controls blinds, curtain, awnings as well as RTS enabled lighting devices.

Plug & Go

Plugs directly into a wall socket and follows on-screen set-up wizard. Easy!

Timed Event

Schedule your scenarios to run on a weekly plan.

Remote Access

Maximise the many benefits such as energy saving and privacy even when you're away from home.

Lighting

Lighting receivers

Your customers can turn their lights on and off using an RTS remote control.

- Link lighting receivers with either the TaHoma™ One or Somfy myLink home automation systems
- Customers can make their home look occupied with lighting scenarios
- Ability for customers to turn on lights while not at home with Somfy myLink
- Three mounting options: indoor, outdoor and in wall mounting

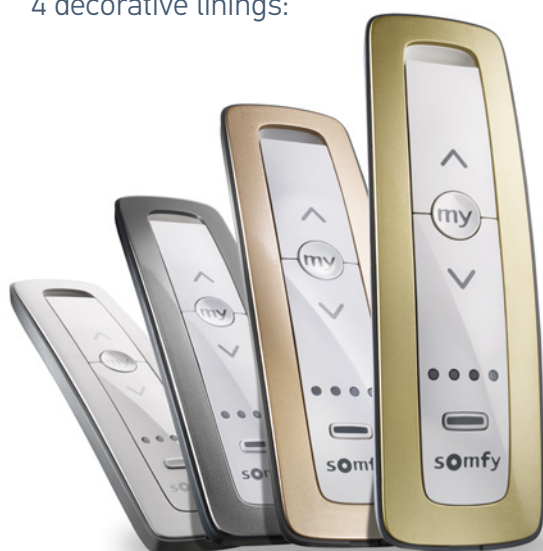

Situo

My lifestyle my Situo

Much more than just a remote control for your customer's motorised applications. This is a decorative element designed to fit with the most elegant lifestyles.

My customisation, my Situo

4 decorative linings:

Pure Silver Rose Gold Gold

Several versions to meet your needs:

- 1 channel for a single blind
- 2 channels, ideal for double curtains (sheer and blackout)
- 5 channels for your best convenience

My touch, saves your favourite position

To manage equipment: sheer curtain, roller blinds, pleated blind or romans

Sonesse range of quiet motors

The new acoustic standard for the interior window covering market

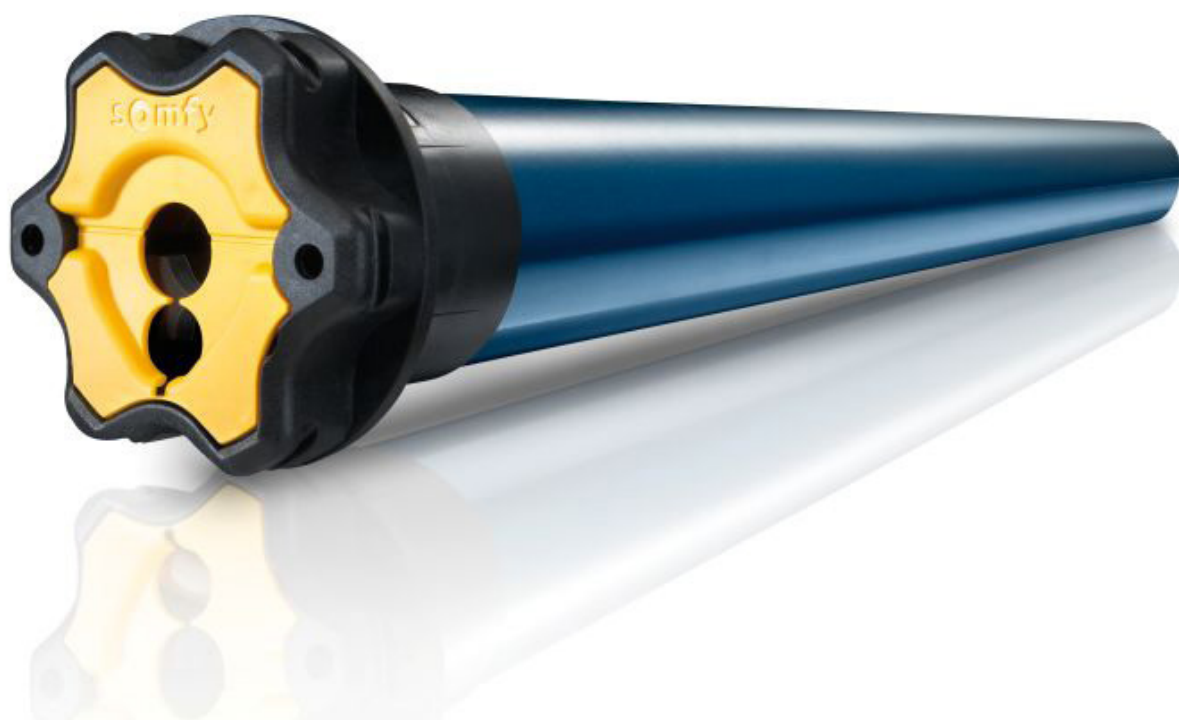

The new Sonesse 50mm offer now consists of WT, RTS and RS485 integrated motors all with 10/28 and 15/17 variants. There is also a 6/17 round head version available.

- Quiet, customised, value added interior window coverings to set you apart from your competition and help you to gain new business
- Supported at every stage of the installation process to ensure your products offer the very best performance, flexibility and choice for your customers
- Available in a wide range of torques and speeds to motorise all interior applications

The new 50mm offer completes the Sonesse range, which includes the Sonesse 40, available in WT and RTS with 3/30 and 6/20 variants

The Sonesse range of quiet motors meet the needs of a demanding market

- Full range available and compatible with most control systems: WT, RTS, RS485
- Designed for all types of projects: commercial and residential buildings, new-builds and renovation developments

Glydea

High performance motorisation solutions for curtains

Glydea provides discreet, flexible and robust solutions for motorising all types of curtains and with a wide choice of control options.

Benefits

Comfort & Convenience

- Convenient solution for glare reduction and privacy
- Superior performance, reliability and ease of operation
- Close and open all curtains with a single touch
- Smartphone and tablet app available for quick and easy control even while away

Energy Savings

- Reduce energy costs and protect furnishings from damaging UV rays
- Utilise timers to schedule daily open and close times
- Add sensors that react to the sun's intensity & positioning

Flexibility and Reliability

- Extends the lifespan of curtains by minimising the damage associated with manual operation
- Compatible with all types of curtains and broad range of controls, sensors, timers and Somfy home automation systems

Wirefree Rollup 28 RTS, Tilt & Lift RTS and Solar Panel

Without any wire the easy-to-fit motorisation for small and medium applications

Wireless motorisation solutions: hassle-free, plenty of benefits

- With Somfy's Wirefree range, develop a complete wireless motorisation solution with high added value
- For all types of interior blinds
- Compatible with all Somfy wireless controls and home automation systems
- Wireless installation: simple, easy and clean with no need for an electrician
- Many power options available regardless of motor selection

Wirefree Rollup 28 RTS Features:

- Motorisation of roller blinds
- Integrated radio receiver
- Adjustable top and bottom limits via remote control

Tilt & Lift RTS Features:

- Motorisation of venetian blinds
- Integrated radio receiver
- Adjustable top and bottom limits set via remote control

Solar Panel Features:

- Harnesses renewable solar energy to power wirefree motorised window coverings
- Offers a green alternative by reducing the replacement and disposal of standard batteries

Orea/Loggia

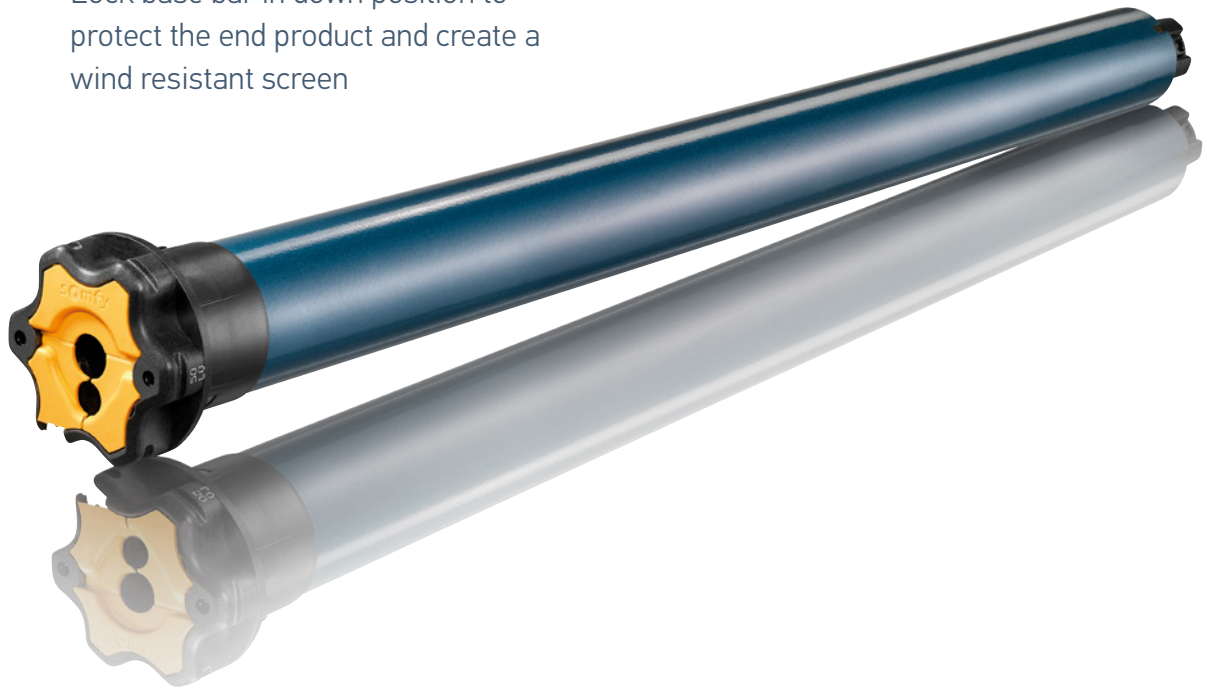

External screen solutions

The Orea motor with ABS wheel features:

- Over torque top limit to ensure fabric always remains tight at top closure
- When using an ABS wheel obstacle detection is enabled in the downward direction to protect the end product

The Loggia motor features:

- Lock base bar in down position to protect the end product and create a wind resistant screen

animeo IP

Ideal for any size buildings, animeo IP makes it easy to manage commercial projects.

Thanks to plug and play wiring, animeo IP is simple and accurate to install. The intuitive user interface gives drag-and-drop zone creation, automatic motor discovery and at-a-glance system status updates making project commissioning quick and simple. Somfy offer full support including project commissioning and building management system interfacing services.

Live system feedback with status notifications:

Full motor and group positioning feedback and email notifications for status updates
