

Telis 6 Chronis RTS

Centralised control with timed programming

For the installer: The Telis 6 Chronis RTS saving you time on site!

- Quick, **wireless installation** with no cables required for the control point, using radio technology that you are already familiar with.
- **Save even more time during configuration with the copy and paste function:** no more repetitive programming sequences!
- **Limited maintenance needed:** the simple interface means that users will be able to take control themselves.

For your customers: the advantages of Somfy that make life easier!

- **Greater comfort** with a centralised control and timer programming.
- **Greater security** with presence simulation that can be activated with a single press.
- **Greater energy savings** with the 'dusk' function.
- **Greater peace of mind** with automatic timed features.

Telis 6 Chronis RTS

Greater clarity means greater time savings

Two operating modes, two main functions!

MANUAL MODE

The control function

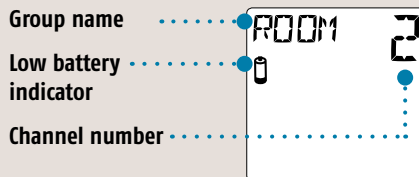

In manual mode, the programmable clock is disabled.

> Six channels to control, six groups of applications

Telis 6 Chronis RTS can be used to control groups of motorised products in the home from a central location: roller shutters, indoor blinds, outdoor screens, awnings, etc.

> Name groups to find them again more easily

The end user can name each group on the screen (up to five alphanumeric characters) and assign a channel to each group.

Confirm and mode selection button

Navigation arrows to move from one channel to the next

"Up" button

"Stop" button" or «my» favourite position

"Down" button

A step-by-step online help tool:

AUTOMATIC MODE

The clock function

> Each week can be programmed day by day

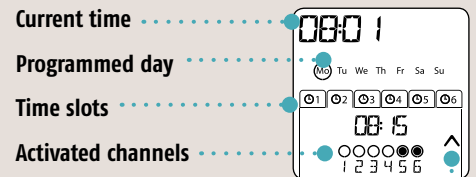

In automatic mode, the clock manages in each zone of the home, the movements of groups of motorised products. Each day of the week can be programmed separately.

> Six time slots per day

User can easily program up to six time slots in any given day. Each time slot applies the same order to all selected groups.

> Mode selection

With a single press of the selection button, switch from manual to automatic mode.

Display: at 08:15, an automatic order will be sent to raise the products in groups 5 and 6. The programmed time shown is always later than the current time.
